

RZ Cleaning recommendations

ELECTRICALLY CONDUCTING SELF-SMOOTHING FLOOR COATINGS

The cleaning system to be selected depends on the size of the floor, its use and the base treatment.

Regular cleaning	Arturo EP2480 Arturo EP2490	Product	Frequency			Equipment/materials required
	Methode		Daily	Weekly	Periodically	
Dust-collecting system Damp mop Scrubber-dryer		RZ Floor Care ◆ 1:200	●	●		Duo-bucket Carriage Scrubbing Machine RZ Microfibre Mop T-Bar
Interim cleaning	Cleansing activities Apply when needed	RZ PUR Cleaner ◆ 1:200 In specific cases up to 1:10 possible			●	White 3M Pad (soft cleaning) Red 3M Pad (stronger dirt content) RZ Microfibre Mop
Thorough cleaning**	Wet scrubbing and suction At least once a year	RZ Basis Cleaner Universal ◆ 1:10 up to 1:1			●	Red 3M Pad RZ Microfibre Mop

◆ = Product dose / depend on degree of contamination

* = strongly advised because all other cleaning agents reduce the electrical conductivity of the surface

** = when needed, at least once a year

ELECTRICALLY CONDUCTING SELF-SMOOTHING FLOOR COATINGS

Important information

Dust and loose dirt adversely affect the friction of the floor surface. It is advisable to remove loose dirt and dust on a daily basis.

Note: Protective treatments higher than R10 slip resistance are not possible by applying a polymer dispersion!

Fine cleaning

Remove loose dirt with a vacuum cleaner or with a dust-collection cleaning system. Scrub with a red pad and then remove water by suction.

Rinse, remove water again by suction and leave to dry.

Uzin Utz Nederland bv operates the quality assurance system in accordance with NEN-EN ISO-9001/14001 and is certified for this by TÜV Nederland QA. This means that deliveries are made in accordance with the product and process specifications drawn up for this system. Products and services supplied by Uzin Utz Nederland bv also comply with the description in these technical specifications.
